DONALDSON FILTERS

Whether it's air, fuel, oil, or hydraulic, Donaldson will have what you need. You can be confident that these aftermarket filters are of the highest quality - after all, they are not the industry leaders in aftermarket filters for nothing.

Using the best technology Donaldson filters will protect your equipment, giving you peace of mind. And now with their heavy-duty 4WD filter kits designed specifically for diesel engines, you can rest assured that your investment is in the best hands.

You will find what you need [here](#).

4WD Kits

For ease of filter selection for 4WD, Donaldson have created a range of 4WD kits.

Donaldson's expertise in heavy duty diesel engines gives you peace of mind when choosing aftermarket filtration for your 4WD. Most other 4WD filter brands are derived from the general automotive car industry and their filters simply aren't designed for off-road heavy-duty diesel engines. With nearly 100 years of experience in filtration technology, Donaldson's high quality products have been designed to meet or exceed OEM specifications.

All popular 4WD kits now come in a new, descriptive and display friendly packaging. The new full colour outer sleeve clearly lists the make, model and engine details, cross reference and part number information as well as actual images of the filters inside each kit. You can also scan the QR code on each kit to go directly to the website where you can find more information on the range of kits including the brochure, product profiles and more.

Donaldson 4WD kits combine the convenience of having all necessary filters for a full service in one handy kit, along with the heavy-duty design and reliability associated with their well renowned off-road filtration expertise. With over 20 different kits in the range, Donaldson 4WD filter kits contain the necessary air, oil and fuel filters to suit popular makes of 4WDs including Landcruisers, Hilux and Patrols.

Bulk Fuel Tank Kit

Donaldson now offer a storage tank filtration system that will dramatically reduce contamination and moisture, resulting in cleaner fuel. And clean fuel means reduced equipment failure and repairs.

The kit comes with everything needed for installation, including 1" BSP taper fittings for use with the most common tank and hose threads.
